

JPods - An Alternative to the Columbia Pike Streetcar!

Columbia Heights Civic Association is hosting a Pike-Wide meeting to discuss an alternative to traffic congestion. All are welcome!

**Monday, September 28, 2015 - 7:00 p.m.
Walter Reed Community Center**

This new technology solves many of the street-car complaints:

- ◆ The system would be privately funded, with no public funding needed!
- ◆ Operated with solar panels, it's carbon-free transportation.
- ◆ No need for special lanes or tracks to conflict with current traffic.
- ◆ No stops at street lights, so faster travel times. Glebe Road to Pentagon City Metro in five minutes or less!
- ◆ This nodal system can be expanded easily in all directions for north-south connectivity to Crystal City, Ballston, Fairfax, Alexandria.
- ◆ Unlimited ability to add "pods" to system for maximum delivery of people and cargo!

**Please come and see what this is all about.
Columbia Heights Civic Association Annual Meeting!**
